Respiratory Care Clinical Competency Lab Manual provides the practical skills needed to apply classroom theory to clinical practice. This text has the flexibility to be used in conjunction with all other respiratory care titles, as well as in other disciplines that require competencies in respiratory therapy. With detailed, step-by-step procedures, supporting procedural illustrations, hands-on lab exercises, case studies, and critical thinking questions, this text helps you understand and apply theoretical knowledge by demonstrating specific skills. Procedural competency evaluation forms help you to assess your progress and performance of specific procedures. Detailed, structured lab activities provide hands-on opportunities to assess psychomotor and patient communication skills in a controlled environment. Content correlation to NBRC combined CRT/RRT exam content outlines helps you better prepare for credentialing exams. Step-by-step procedural competencies prepare you for the RT competency areas established by the American Association of Respiratory Care (AARC) and meet the national practice standards for patient care. Up-to-date coverage of current technology, equipment, Clinical Practice Guidelines (CPGs), CPR guidelines, and CDC recommendations, and mass casualty/disaster management equips you with the most state-of-the-art training for respiratory care. Integration of case-based questions within the lab activities helps you develop and promote your critical thinking abilities. UNIQUE! Coverage of polysomnography addresses clinical evaluation in this expanding specialty area. Over 200 images provide visual guidance on how to perform procedures. UNIQUE! Reality Check boxes arm you with practical knowledge on real-world application of various procedures. UNIQUE! Tip boxes supply you with helpful pointers for the clinical arena. Glossary of terms offers quick reference to terms presented in the text.

Prepare yourself for success in the classroom and the clinical setting with the Workbook for Mosby ' s Respiratory Care Equipment, 9th Edition. This versatile workbook is specifically designed to clearly and concisely reinforce the most clinically relevant information presented in the text. Featuring a wide variety of exercises ranging from crosswords and case studies to NBRC-style multiple-choice questions, this workbook will provide focus and improve your study time. Matching, labeling, short answer, crosswords, calculations, and case study exercises reinforce the most clinically relevant information in the textbook. The wide variety of exercises gives you several ways to assess your knowledge and identify the areas where more practice is needed. Critical thinking questions help you apply and analyze content learned from the text. NBRC-style questions prepare you for what you will encounter when taking the NBRC credentialing exam. Learning objectives reflect the same objectives from the textbook and reinforce the basic concepts to be learned from each chapter. NEW! Additional exercises further prepare you for the NBRC credentialing exam.

Rely on this best-selling laboratory manual to provide the hands-on practice you need to confidently perform the most common to complex respiratory procedures for class and clinical. Step-by-step instructions with detailed diagrams and illustrations seamlessly guide you through every procedure. Completely revised and updated, the 3rd Edition reflects the latest technologies and standards of care, including the most current respiratory equipment.

From the Back Cover: Basics of Public Health Core Competencies is a reader-friendly review of the five core competencies outlined by the Association of Schools of Public Health. One chapter is devoted to each of the disciplines of epidemiology, biostatistics, behavioral and social sciences, environmental health, and health policy and management sciences, along with vignettes that illustrate the application of concepts. Using a clear outline format, this text is ideal for courses that offer a basic introduction to the field of public health, or for courses that prepare MPH students for the new Certification in Public Health exam. Learn more about each competency with the Essential Public Health series. See www.jbpub.com/essentialpublichealth for the latest information on the series.

This competency-based learning system covers the administrative, clinical, and general areas necessary for entry-level employment as identified by the medical assistant role delineation study issued by the American Association of Medical Assistants. A listing of role delineation areas in each unit and in Appendix A make it easy to locate specific skills within each competency. A unit on related therapies presents information on complimentary and alternative treatments.
