The crime scene investigation unit and its personnel must be organized so that the unit runs efficiently but cannot be structured so rigidly that it ceases to maintain the ability to remain flexible as crime scene investigations will always require some measure of flexibility.

~~Unit Organization and Personnel~~ ~~Crime Scene Unit~~

As part of crime scene management, protecting the integrity of the crime scene involves several specific processes that fall under the Tasks category of the STAIR Tool. These are tasks that must be performed by the investigator to identify, collect, preserve, and protect evidence to ensure that it will be accepted by the court.

~~Chapter 5: Crime Scene Management~~ ~~Introduction to~~

The crime scene reports produced by a unit must also be consistent in presentation, style and format from one CSI to the next. The audience of readers is limited and the same people will repeatedly need to read and understand the reports that are produced for the various cases that different members of the unit handle.

~~Reports and Records Management~~ ~~Crime Scene Unit~~

The purpose of crime scene management is to control, preserve, record, and recover evidence from the scene of an incident. Any evidence removed from a scene by investigators must be packaged and labelled correctly to prevent injury and contamination. Once forensic analysis begins, it is important to ensure that the questions asked are investigative and not purely scientific.

The primary responsibility of the Crime Scene Unit (CSU) is to assist the road patrol officers and detectives in crime scene investigations. The CSU processes a wide variety of crime scenes ranging from the larceny of automobiles to homicides. Crime scene processing may consist of: photographing and sketching the scene; dusting for and collecting latent fingerprints; collecting hairs, fibers, and bodily fluids; and photographing and casting both footwear and tire impressions.
