Journey's End: Bomber Command's Battle from Arnhem to ... Like its predecessors in the trilogy examining the Royal Air Force's Bomber Command in the Second World War (Bomber Boys: The RAF Offensive of 1943and Men of Air: The Doomed Youth of Bomber Command (Bomber War Trilogy 2)), Journey's end is well researched but written from a perspective closely aligned with that from within the Command (the aircrew in particular) rather than as a detached external observer. Covering operations from September 1944 to after VE Day, Journey's End does offer an ...

Amazon.com: Journey's End: Bomber Command's Battle from ... 'Bomber Boys' took us from the point where Bomber Command was finally turned into a powerful air arm, able to strike effectively at last at the Reich, 'Men of Air' continued through the dark years of attrition during 1943/4, and Journeys End takes us from 1944 to the end of Bomber Commands war.

Amazon.com: Journey's End: Bomber Command's Battle from ... How Bomber Command Helped Win. The Battle Of Britain. The RAF's victory over the Luftwaffe during the Battle of Britain in the summer of 1940 made a German invasion of Britain all but impossible. In his book Bomber Offensive, published in 1947, Marshal of the Royal Air Force Sir Arthur Harris wrote that all the credit for preventing the invasion of Britain had been given to Fighter Command.

How Bomber Command Helped Win The Battle Of Britain ... Journey's End: Bomber Command's Battle from Arnhem to Dresden and Beyond, by Kevin Wilson Dresden has hung heavily over Bomber Command, but this final part of a fine trilogy restores the young...

Amazon.co.uk: bomber command: Books From July 1940 to the end of the year, Bomber Command lost nearly 330 aircraft and over 1,400 aircrew killed, missing or captured. Bomber Command was also indirectly responsible, in part at least, for the switch of Luftwaffe attention away from Fighter Command to bombing civilian targets. A German bomber on a raid got lost due to poor navigation and bombed London.

RAF Bomber Command - Wikipedia The major offensive by Great Britian against Germany durring World War II was Bomber Command attacks at night. This attack was a failure. The RAF killed a lot of civilians but lost an unacceptable number of aircrew during this campaign. This book gives a daily listing of every sortie Bomber Command made durring the war.

The Bomber Command War Diaries: An Operational Reference ... From 1942, Bomber Command seriously damaged the Third Reich's war economy by attacking industrial, communications and fuel targets in occupied Europe and Germany. Although the strategic bombing campaign undoubtedly shortened the war, it remains controversial because it resulted in the deaths of an estimated 600,000 German civilians and over 55,000 British, Commonwealth and Allied airmen.

The Second World War, 1939 to 1945 - Bomber Command Like its predecessors in the trilogy examining the Royal Air Force's Bomber Command in the Second World War (Bomber Boys: The RAF Offensive of 1943and Men of Air: The Doomed Youth of Bomber Command (Bomber War Trilogy 2)), Journey's end is well researched but written from a perspective closely aligned with that from within the Command (the aircrew in particular) rather than as a detached external observer. Covering operations from September 1944 to after VE Day, Journey's End does offer an ...

The final, climactic volume of Wilson's acclaimed bomber war trilogy. In February 1945, British and American bombers rained down thousands of tons of incendiaries on the city of Dresden, creating one of the greatest firestorms in history. Their bombs killed an estimated 25,000 people, and wiped one of the most beautiful cities in Europe from the map. The controversy that erupted shortly afterwards, and which continues to this day, has long overshadowed the other events of the bomber war, and blighted the memory of the young men who gave their lives to fight in the skies over Germany. This book neither condemns the bombing of Dresden, nor excuses it, but simply puts it in its proper context as a devastating set of raids in a much larger campaign. To the crews who flew over Germany night after night there were other much more pressing worries: the V2 rockets that threatened their loved ones at home, the brand new German jet fighters that could strike them at speeds of over 600mph, the deadly flak over the cities of the Ruhr Valley. The bomber war had entered its final unforgiving months, and no quarter was given on either side. Kevin Wilson has interviewed over a hundred people for this book, some of whom flew on the Dresden raids, and many more who experienced other aspects of bombing, both in the air and on the ground. JOURNEYS END chronicles the brutal endgame of a conflict that caused devastation and tragedy on both sides.

Since the Second World War, depictions of Royal Air Force operations in film and television drama have become so numerous that they make up a genre worthy of scholarly attention. In this illuminating study, S. P. MacKenzie explores the different ways in which the men of RAF Bomber Command have been represented in dramatic form on the big and small screen from the war years to the present day. Bomber Boys on Screen is the first in-depth study of how and why the screen-drama image of those who flew, those who directed them, and those who provided support for RAF bomber operations has changed over time, sometimes in contested circumstances. Until now dramas that focus on Bomber Command have tended to be mentioned only in passing or studied in isolation, despite the prevalence of surveys of both the British war film genre and of aviation cinema. In Bomber Boys on Screen MacKenzie examines the development, presentation, and reception of significant dramas on a decade-by-decade basis. Titles from the beginning of the war (The Lion Has Wings, 1939) to the start of new century (Bomber's Moon, 2014) are situated in the context of technical possibilities and limitations, evolving social and cultural norms in the United Kingdom and elsewhere, and the development of moral and utilitarian controversies surrounding the wartime bomber offensive directed against Nazi Germany. While the focus is on feature films and television plays, reference is also made to documentaries, memorials, veterans' organizations, book titles, war comics, and other representations of the war fought by Bomber Command.

Sometimes tragedies that have little to distinguish them from a wide range of similar events and which can make no claim to record numbers of casualties or destructive impact go down in history as fundamental and emblematic. This is the case of two of the airstrikes discussed in this volume: Barcelona and Dresden. Other tragedies, however, are sometimes obscured by circumstances elsewhere. This is the case of the 'other Guernicas': that is to say, the bombings of Otavando, Durango and Elorrio in Biscay. They are good examples not only of the brutality inherent in all wars and of how methods of combat become increasingly barbaric as conflicts wear on but also of the way in which some circumstances push events to the forefront of history and make them emblematic.

The story of the everyday heroism of bomber crews in 1944, a turning point in the war against Germany. Bomber combat crews faced a wide array of perils as they flew over Gorman territory. Bursts of heavy flak could tear the wings from their planes in a split second. Flaming bullets from German fighter planes could explode their fuel tanks, cut their oxygen supplies, destroy their engines. Thousands of young men were shot, blown up, or thrown from their planes five miles above the earth; and even those who returned faced the subtler dangers of ice and fog as they tried to land their battered aircraft back home. The winter of 1944 was the most dangerous time to be a combat airman in RAF Bomber Command. The chances of surviving a tour were as low as one in five, and morale had finally hit rock bottom. In this comprehensive history of the air war that year, Kevin Wilson describes the most dangerous period of the Battle of Berlin, and the unparalleled losses over Magdeburg, Leipzig and Nuremberg. Men of Air reveals how these ordinary men coped with the extraordinary pressure of flying, the loss of their colleagues, and the threat of death or capture. Brilliantly placing these stories within the context of The Great Escape, D-Day, the defeat of the V1 menace, and more, Wilson shows how the sheer grit and determination of these "Men of Air" finally turned the tide against the Germans.

August 1939 was a time of great flux. The fear of impending war fueled by the aggression of Nazi Germany forced many changes. Young people pursuing academic research were plunged into an entirely different kind of research and development. For Bernard Lovell, the war meant involvement in one of the most vital research projects of the war-radar. Echoes of War: The Story of H2S Radar presents a passionate first-hand account of the development of the Home Sweet Home (H2S) radar systems during World War II. The book provides numerous personal insights into the scientific culture of wartime Britain and details the many personal sacrifices, setbacks, and eventual triumphs made by those actively involved. Bernard Lovell began his work on airborne interception radar in Taftly Bowen's airborne radar group. He was involved in the initial development of the application of the 10 centimeter cavity magnetron to airborne radar that revolutionized radar systems. In the autumn of 1941, the failure of Bomber Command to locate its target over the cloudy skies of Europe prompted the formation of a new group to develop a blind bombing system. Led by Lovell, this group developed the H2S radar system to identify towns and other targets at night or during heavy cloud cover. H2S first saw operational use with the Pathfinder Squadrons in the attack on Hamburg during the night of January 30-31, 1943. Two months later, modified H2S units installed in Coastal Command aircraft operating over the Bay of Biscay had a dramatic tactical effect on the air war against U-boats. The tide had begun to turn. In this fascinating chronicle of the H2S-radar project, Sir Bernard Lovell recreates the feel and mood of the wartime years.

Originally published in 1956, former Second World War prisoner-of-war Calton Younger's No Flight from the Cage received critical acclaim. One critic wrote, "[the book goes below the surface of prison camp life and shows a remarkable insight into the minds of men forced to live under conditions of tension and strain.]" The former Royal Australian Air Force Bomber Command airman has now revised, expanded and updated his original work: [the story of a young man's journey to war, of being shot down in May 1942, of three years spent behind barbed wire, and of enduring forced marches as the Nazi state crumbled. The author also recounts his adventures on the run in France prior to capture and his return, in 1949, to search for the people who helped him. In sensitive, gripping, yet often humorous prose, Cal Younger describes the toil and deprivations of prison camp life. There are the extraordinary characters, notably the inspirational camp leader James 'Dixie' Deans, who, as the war neared its end, and following a tragic attack by (friendly!) Allied aircraft on a marching column, cycled through the fighting to British lines, and then returned to rejoin the march. There is the brutality Cal witnesses. At Stalag Luft VI, an escape campaign, ruthlessly carried out, ends with the suicide and execution of guards and prisoners. Then there is the amusing but dangerous brinksmanship of Hun-baiting. This revised edition incorporates previously unpublished photographs along with numerous illustrations and cartoons depicting camp life, as sketched by the author while a prisoner-of-war. No Flight from the Cage has become one of the classic prisoner-of-war memoirs. A book, as stated by General Sir John Hackett, that 'deserves to be read and reread', and (an adventure in the exploration of the human spirit whose total effect is both sobering and uplifting)].

The heroic, dramatic, and sometimes tragic history of how the US 8th Air Force changed the course of World War II. The US 8th Air Force came of age in 1944. With a fresh commander, it was ready to demonstrate its true power: from Operation Argument in February(targeting German aircraft production plants)to bringing the Luftwaffe to battle over Berlin, the combined US Air Force-Royal Air Force forces' round-the clock campaign bottled up the German army in Normandy. Day after day, the American bomber boys watched their comrades burn to death in blazing bombers, or observed their comrades being thrown out of exploding aircraft without parachutes and sink with their crippled aircraft in the freezing North Sea. But by the following spring they had destroyed the Nazis' fighting spirit and saw Germany broken in two. In this authoritative history, Kevin Wilson reveals the blood and heroism of the 8th Air Force. At the same time, he opens up the lives of the Women's Army Corps and Red Cross girls who served in England with them and feared for the men in the skies, and he hasn't flinched from recounting the devastation of bombing or the testimony of shocked German civilians. Drawing on first-hand accounts from diaries, letters, and his personal audio recordings, the author has brought to life the ebullient Americans' interaction with their British counterparts, unvelling stories of humanity and heartbreak. Thanks to America's bomber boys and girls, the tide of World War II shifted forever.
