The Complete LibGDX Game Course Using Java | Udemy

A simple game I am building in libGDX, inspired by procedurally generated games like Minecraft and puzzle games like Chip's Challenge. - BenMcLean/badchallenge

GitHub - BenMcLean/badchallenge: A simple game I am ...

LibGDX is a multiplatform game development framework, and is one of the most popular frameworks for building games, providing a comprehensive set of development capabilities and features to use and incorporate into games.

Learning LibGDX Game Development - Second Edition: Nair ...

I've read that Libgdx allows you to interface directly with their classes and is more developer centric, while Unity is geared towards a person that is less skilled a coding. Barrier to entry is much lower with Unity because it has an editor, but I wouldn't say it's geared towards people less skilled at programming. Unity have been moving toward C# only for awhile now, so it has gotten away from Boo and UnityScript (both have now been removed from the engine).

Unity vs Libgdx for desktop : gamedev

zfedoran's procedural sprite generator ported to libGDX for use in Java-based games. - BenMcLean/pixel-sprite-generator-libgdx

GitHub - BenMcLean/pixel-sprite-generator-libgdx: zfedoran ...

It seems libgdx barely goes over 30k actually. But still seems amazing. This is on the same level as Qt for me, almost perfect, except I'm not really worried about performance on it. libgdx can build for everything pretty much. XNA + MonoGame--- MonoGame's performance seems only slightly lower than libgdx, can build to most platforms. However I don't know much about XNA and I heard it won't be receiving future updates, but is quite stable?
