The first work to draw together the law on shams across the broad range of fields in which it occurs including tax, trusts, company, contract, tenancy, and employment law. The book features contributions from first class scholars and practitioners, as well as incisive comparative analysis by the editors.

Once upon a time, he was everything to her, except for one thing: her future Christmas sparkles from every bough and window at the cozy Four Winds Ski Resort, where single mother Eden Kendall and her eight-year-old son are spending the holiday. A surprise marriage proposal from her boss's son wasn't on her Christmas list, but it's the perfect excuse to get away and weigh her options. She never imagined her son's ski instructor/Santa impersonator would be the gorgeous, charismatic dreamer she left behind years ago, the one who still owns a piece of her heart. Cole Hagan has never stopped loving Eden and he's spent the last eight years proving her wrong on every count about his potential. While he fights to save the resort that he helped to build by organizing a holiday concert, he decides it's about time that Eden puts aside her list-making pragmatism so that she and her skeptical son can experience the true magic of Christmas. Can a not-so-perfect angel help this unlikely pair get a second chance at happily ever after?

We are working with Cambridge Assessment International Education to gain endorsement for this title. Develop theoretical and practical IT skills with this comprehensive Student's Book written by experienced authors and examiners specially for the updated Cambridge International Education A Level Information Technology syllabus (9626). - Improve understanding of concepts and terminology with clear explanations, labelled illustrations, photographs, diagrams, plus a glossary of key terms - Develop theoretical and practical skills with a range of exercises (multi choice through to discussion type questions), exam-style questions, step-by-step instructions and example answers that all ensure skills are developed alongside knowledge - Follow a structured route through the course with in-depth coverage of the full syllabus Also available in the series: Cambridge International AS Level Information Technology Student's Book 9781510483057 Cambridge International AS Level Information Technology Student eTextbook 9781510484429 Cambridge International AS Level Information Technology Whiteboard eTextbook 9781510484436 Cambridge International AS Level Information Technology Skills Workbook 9781510483064 Cambridge International A Level Information Technology Student eTextbook 9781398307018 Cambridge International A Level Information Technology Whiteboard eTextbook 9781398307025 Cambridge International A Level Information Technology Skills Workbook 9781398309029 Cambridge International AS & A Level Information Technology Online Teacher's guide - coming soon

OCR Information and Communication Technology GCSE Student's Book has been published to support OCR's new specification. Written by highly experienced senior examiners and teachers, the text covers the four units of the course: - ICT in Today's World - Practical Applications in ICT - ICT in Context - Creative use of ICT and Coding a solution The core knowledge and understanding required by students for the examined units is provided through an accessible and comprehensive narrative. Tasks and exam-style questions are provided throughout the chapters, providing students with opportunities to prepare for the exams. Students are also provided with support in tackling the tasks demanded by Units 2 and 4a / 4b of the course.

"Injections + Appointments + Egg Retrieval + Embryo Transfer = Resources (Energy x Time x Emotion)" That's the equation that was projected onto the screen when Beth Kohl and her husband first showed up at the in vitro fertilization (IVF) clinic. "Good evening," the program's psychologist told the gathered infertile couples. "Before you begin your treatment, you should know that this program is emotionally and psychologically stressful." And how. In this marvelously unconventional account of her struggles to bear children, Kohl leads the reader on an oh-so-up-close tour of fertilization in America, and the ways in which science and miracle, technology and faith, converge to create life in the twentyfirst century. Along the way, Kohl wrestles with a new world of medical ethics: Should she "selectively reduce" the number of embryos successfully implanted in the womb in order to prevent a potentially complicated pregnancy? How much genetic testing of fertilized eggs is too much? What is she supposed to do with the seven embryos left over from the IVF process? When Andrew Solomon wrote The Noonday Demon, he opened the world of depression to readers as no writer had done before. And when Stephen L. Carter wrote Reflections of an Affirmative Action Baby, many readers were forced to completely rethink race and prejudice. Kohl's spirited and rich exploration of "embryo culture" will completely revise how we see modern motherhood.

Build your own intelligent agent system... Intelligent agent technology is a tool of modern computer science that can be used to engineer complex computer programmes that behave rationally in dynamic and changing environments. Applications range from small programmes that intelligently search the Web buying and selling goods via electronic commerce, to autonomous space probes. This powerful technology is not widely used, however, as developing intelligent agent software requires high levels of training and skill. The authors of this book have developed and tested a methodology and tools for developing intelligent agent systems. With this methodology (Prometheus) developers can start agent-oriented designs and implementations easily from scratch saving valuable time and resources. Developing Intelligent Agent Systems not only answers the questions "what are agents?" and "why are they useful?" but also the crucial question: "how do I design and build intelligent agent systems?" The book covers everything a practitioner needs to know to begin to effectively use this technology - including an introduction to the notion of agents, a description of the concepts involved, and a software engineering methodology. Read on for: a practical step-by-step introduction to designing and building intelligent agent systems. a full life-cycle methodology for developing intelligent agent systems covering specification, analysis, design and implementation of agents. PDT: Prometheus Design Tool - software support for the Prometheus design process. the example of an electronic bookstore to illustrate the design process throughout the book. Electronic resources including the Prometheus Design Tool (PDT), can be found at: http://www.cs.mit.edu.au/agents/prometheus This book is aimed at industrial software developers, software engineers and at advanced undergraduate students. It assumes knowledge of basic software engineering but does not require knowledge of Artificial Intelligence or of mathematics. Familiarity with Java will help in reading the examples in chapter 10.

This guide to diagnosing and treating skin conditions commonly encountered by the non-specialist, incorporates colour photographs, concise descriptions, best treatment options and patient handout pages detailing the aetiology and treatment of the skin conditions described in the text.

The Low Protein Food List for PKU has been an indispensable resource for everyone involved in the treatment of phenylketonuria (PKU) since 1995. This third edition contains over 6,000 entries, the most extensive listing yet of foods that are potentially suitable for the diet, nearly double the number found in the previous edition. It includes many new foods found at health-oriented grocery stores, expanding choices for the diet. The book provides information on phenylalanine (phe), protein, and calorie content of foods based on serving portions, both in common measures and gram weights, in an easily searchable format. The handy "mg phe/gm food" column allows users to compare phenylalanine density of foods and make appropriate food choices for individual diet needs. People using an "exchange" system for counting phe will find exchanges are calculated for each food portion as well. The front section of the book also contains valuable information and tips for managing the PKU diet.

Ever been to play a round of golf and found you're having a bit of an 'off' day? Perhaps the ball seems to be flying everywhere except towards the green; or maybe you get stuck in a bunker or a tricky water feature and find it impossible to chip your way out. Such situations can be more than a little frustrating. So, do you ever wonder what the experts would do? Sid Norton's book, written with the keen amateur player in mind, aims to demystify all the professional advice out there which is sometimes conflicting and often confusing for the novice. Dealing with such things as the correct placing of the feet, stance and weight distribution and the position of the arms in a swing, this accessible and down-to-earth book is the ideal first guide to the game. It also tackles head-on some of the more obscure and less well-documented problems which might be cause for concern. Throughout, however, Norton maintains that improvement of your game is only a means to an end - the ultimate aim is not to pot the ball but to enjoy doing it!
