Solved ICAR ARS NET Questions on Plant Pathology Biology ...

The foundation of modern plant pathology was laid by Parsoon (1801) and Fries (1821). They believed that microorganisms originate from diseases. A French scientists Prevost (1807) found that diseases are caused by microorganisms. The most important discovery regarding the plant and pathogen relationship was established by Anton de Bary (1831-1888).

Quiz on Plant Pathology | Biology Quiz Online

Multiple choice questions. Please read each question carefully then print the letter of the best answer on the line next to the question. Each correct answer is worth 1 point. ___10. The most rapid disease development usually occurs when the temperature is A. Below optimum for both the pathogen and the plant, but favors the pathogen's growth more than the growth of the plant B. Optimum for the development of both the host plant and the pathogen.
