In 2018 he was able to formalise his experience by passing written and oral exams for membership with the ANZCVS in small animal surgery. Further training is to follow with the OA foundation in orthopaedic fracture management. He is now pleased to offer this mobile surgical service to small animal clinics in Perth and surrounding regional areas.

The practice of small animal orthopedics has advanced considerably in the 15 years since the publication of the first edition of Self-Assessment Color Review of Small Animal Orthopedics. Diagnostic procedures, instrumentation, implant systems, and surgical techniques have evolved and progressed considerably. This second edition of a trusted text keeps pace with the rapidly expanding practice of small animal orthopedics while embracing the developing fields of canine sports medicine and rehabilitative medicine. The newly titled Small Animal Orthopedics, Rheumatology and Musculoskeletal Disorders: Self-Assessment Color Review, 2nd Edition is designed to facilitate active learning through a new selection of clinical case scenarios along with integrated questions and answers that help readers develop sound decision-making skills. This illustrative, self-directed educational tool disseminates essential information to veterinary students,

interns, and residents in training as well as small animal practitioners with specific interests in orthopedics, canine sports medicine, and rehabilitative medicine. In response to feedback provided by readers of the original text, references have been provided for each question, allowing readers the opportunity to delve more deeply into the topic of focus. The book includes contributions from an international group of clinicians and investigators. Orthopedic surgeons, radiologists, internists, pathologists, neurologists, and anesthesiologists as well as veterinarians engaged in rehabilitative medicine have provided their diverse expertise and experience to make this text a comprehensive review of the expanding fields relating to small animal orthopedics.

SELF-ASSESSMENT COLOUR REVIEWS IN VETERINARY MEDICINE: Each book covers a specialist area of veterinary medicine and the format enables the reader to consider a problem fully and then devise a solution. Initiated by Professor Mark Bloomberg and now dedicated to his memory, this review covers all aspects of orthopaedics - principles, techniques, imaging, medicine, surgery and contains cases from 48 contributors worldwide. The cases are presented in question form, accompanied by illustrations, and followed on the succeeding page by full explanatory answers, designed to educate, not just to test. The cases appear in random order, just as they would in practice. A detailed index enables the reader to access topics systematically. The book appeals to professionals in practice and in universities, to students and to those preparing for higher qualifications in surgery, orthopaedics and radiology.

Veterinary Surgical Oncology provides in-depth coverage of surgical techniques for treating cancer in small animal patients. Organized by body system, each chapter presents detailed, well-illustrated descriptions of surgical procedures, with additional information on diagnostic testing, aftercare, outcomes, and prognosis. Edited and authored by members of the Veterinary Society of Surgical Oncologists, **Veterinary Surgical Oncology's** comprehensive coverage of surgical treatments for cancer provides an invaluable decision-making tool and is equally useful for veterinary surgeons and veterinary oncologists. The book begins with introductory chapters on the principles of surgical oncology, multimodal therapy, and interventional radiology, then presents chapters on surgical techniques in all anatomical structures, including procedures not well covered in existing literature. The first book to focus on the surgical aspects of cancer treatment, **Veterinary Surgical Oncology** is an essential reference for anyone with an interest in surgical

Presented in an easy-to-read format, *Small Animal Imaging: Self-Assessment Color Review* offers a case-based approach to reviewing and interpreting images and developing a differential diagnosis when necessary. Each case begins with the patient's age, gender, breed, and species. The reason the patient was brought to the clinic is discussed along with preliminary examination and diagnostic test findings. The book covers nearly 200 cases with supporting high-quality images for each case. Provides detailed answers for each case, including radiographic findings and diagnosis. Is written by well-respected experts in the field. A separate section presents detailed answers for each case including information on the radiographic findings. Also included are the radiographic diagnosis, comments, and notes on whether further imaging or evaluation is needed. This guide helps practitioners to develop a systematic approach to reviewing images. The easily-navigable text reminds practitioners of the basics in radiography and ultrasound interpretation and diagnosis, making it a quick and convenient reference.

Managing emergency and critical care situations is a daily challenge for veterinary practitioners caring for small animals. The appropriate treatment must be undertaken as quickly as possible and the most life-threatening problem tackled first. This second edition of *Small Animal Emergency and Critical Care Medicine* provides more than 200 new random

Written by a respected expert in the field, this new addition to the *Self-Assessment Color Review* series covers clinical oncology of the dog and cat. More than 200 cases appear in random order, just as they would in practice. These cases are presented as self-assessment problems comprising integrated questions, illustrations and detailed explanations designed to educate on the big picture as well as to provide immediate answers.
