Are you looking for creative ways to lower your energy costs, generate more of your own power, or become less reliant on the grid? Paul Scheckel offers practical advice for taking matters into your own hands. Explaining the fundamentals of solar, wind, water, and biofuel energy production, Scheckel shows you how to build and maintain a wide variety of energy-saving and energy-producing equipment, ranging from thermosiphon solar hot water collectors to bicycle-powered generators. Use less energy, save money, and help preserve the environment.

The solar energy industry is growing at a fast rate. For many customers, purchasing a solar system can be confusing. Also, finding the right information can be a challenge. *Going Solar: The Homeowner's Handbook* is an easy-to-read guide that walks readers through the process of having a solar system installed. You will learn what going solar means from start to finish, giving you the confidence to make the best decision.

Shows how to make houses more energy efficient with projects ranging from simple fixes to large-scale renovations.
